Kristyle Marie Modin

Purok Lomboy Coog, Mandug • Davao City, Philippines 8000 • kmgmodin@addu.edu.ph • 09943190763

Education

Ateneo de Davao University Davao City, Philippines

Bachelor of Science in Computer Science

Thesis: *Sprint-Based Optimization of Security, Performance, and Scalability in a Serverless Donation Platform for Talikala Inc. on AWS*

Academic honor: Dean's Lister, President's Lister

Pablo Lorenzo National High School Davao City, Philippines

Academic honor: With High Honors

Experience

Infinity Hub Digital Marketing Davao City, Philippines

Full-Stack Developer Intern – ManPro Application Project May 2025 – June 2025

- Designed intuitive UI/UX layouts for Performance Evaluation and Announcement modules to enhance usability and accessibility.
- Developed responsive frontend interfaces using React.js, ensuring consistency across desktop and mobile platforms.
- Built and maintained backend services using PHP Laravel, implementing RESTful APIs and efficient database operations.
- Managed version control and collaborative development workflows through Git to streamline code integration and updates.
- Conducted manual and QA testing to identify bugs, verify functionality, and ensure cross-browser compatibility.
- Optimized user workflows and interface performance based on internal testing and stakeholder feedback.
- Debugged and resolved frontend and backend issues to improve application stability and load times.
- Collaborated with a multidisciplinary team to align technical implementation with user and business requirements.
- Delivered tested and documented modules on schedule, contributing to overall project completion and deployment readiness.

Projects

Serverless Donation Management Platform (Thesis) **2025**

Full-Stack Developer

GitHub: https://donation-management-system-git-main-ekayake04s-projects.vercel.app/client/login/

- Engineered a cloud-native donation platform for Talikala Inc. using AWS serverless architecture, enhancing scalability, uptime, and security.
- Developed and deployed backend microservices using AWS Lambda, API Gateway, and DynamoDB, achieving sub-second latency and automated scaling.
- Configured AWS Cognito and IAM policies for secure authentication, authorization, and access segregation.
- Implemented end-to-end data encryption via AWS KMS (AES-256) and enforced HTTPS/TLS for secure communication.
- Integrated CloudWatch and CloudTrail for performance analytics, monitoring, and audit logging, resulting in 99.95% system uptime.
- Utilized AWS Shield and API Gateway throttling to mitigate DDoS and MITM attacks, reducing malicious request success rates by 90%.
- Employed Agile Scrum and Kanban methodologies, delivering four sprints covering authentication, campaign CRUD, and donation modules.
- Optimized operational costs by leveraging AWS Free Tier limits and autoscaling configurations, maintaining a ≤10%

variance between provisioned and actual resource usage.

Technologies: AWS Lambda, API Gateway, DynamoDB, Cognito, KMS, CloudWatch, CloudTrail, S3, SNS, IAM, Shield, Amplify, Agile (Scrum/Kanban)

SAMAHAN Systems Development Website (Organization Project) **2025**

UI/UX Developer & Quality Assurance

GitHub: https://github.com/SAMAHAN-Systems-Development/sysdev-website-frontend

- Designed intuitive and accessible website interfaces aligned with SAMAHAN Systems Development's branding and user needs.
- Developed wireframes and high-fidelity UI/UX prototypes in Figma, ensuring cohesive visual design and smooth user flows.
- Collaborated with developers to translate UI/UX specifications into responsive and functional web components.
- Planned and executed QA test cases covering functionality, usability, UI consistency, and cross-browser compatibility.
- Performed manual testing to identify bugs, layout inconsistencies, and broken workflows across different devices.
- Documented test results, bug reports, and enhancement recommendations to support continuous improvement.
- Conducted regression testing after fixes to ensure system stability and prevent recurring issues.
- Worked closely with the development team to validate updates, resolve issues, and maintain overall platform quality.

Kapitan Sisig POS System **2024**

Full-Stack Developer

GitHub: https://github.com/KristyleModin/KapitanSisig_POS_System

- Designed and developed a custom Point of Sale (POS) and Inventory Management System to streamline business operations.
- Implemented core features using PHP, HTML, CSS, and JavaScript, ensuring responsive and user-friendly interfaces.
- Automated sales transactions, inventory tracking, and report generation to reduce manual processing time.
- Integrated real-time data updates to improve transaction accuracy and support efficient decision-making.
- Enhanced operational efficiency by minimizing manual errors and optimizing workflow for daily sales operations.
- Engineered system architecture to support scalability and performance for multi-location business environments.
- Conducted testing and debugging to ensure stable system performance and accurate reporting functionalities.

Employee Management System **2023**

Full-Stack Developer

GitHub: https://github.com/KristyleModin/Employee-Management-System

- Developed a web-based employee record management system to streamline HR processes for small to medium-sized businesses.
- Built using Python, HTML, and CSS, ensuring a clean and responsive user interface
- Implemented full CRUD functionality (Create, Read, Update, Delete) to efficiently manage employee records and data integrity.
- Designed intuitive forms and layouts to simplify record entry, updates, and retrieval for HR staff.
- Enhanced workflow efficiency by reducing manual documentation and improving data accessibility.
- Conducted testing and debugging to ensure system reliability and error-free performance across browsers.

Omniscient Reader's Viewpoint Website **2022**

Full-Stack Web Developer

GitHub: https://github.com/KristyleModin/orvKhimmy_AppDev

- Developed a digital narrative experience inspired by a Korean web novel, combining storytelling with interactive

web design.

- Created using HTML, CSS, and JavaScript to deliver engaging and responsive user experience.
- Showcased the novel's plot, characters, and themes through immersive visuals and interactive elements.
- Integrated elements of literary analysis and creative web development to enhance narrative understanding and audience engagement.
- Applied modern web design principles to ensure accessibility and smooth navigation across devices.

Leadership & Activities

Power AdDU Ateneo de Davao University, Davao City, Philippines
Member 2024

- Advocated for women's equality and rights as part of the #MusesOfTomorrow movement.
- Participated in campaigns, discussions, and events promoting gender empowerment and inclusivity
- Supported initiatives that fostered awareness, leadership, and representation for women in AdDU

Sysdev (SAMAHAN Systems Development) Ateneo de Davao University, Davao City, Philippines
Quality Assurance Specialist 2024 - 2025

- Ensured the functionality, reliability, and security of software and digital systems developed for university needs
- Conducted test planning, debugging, and performance evaluation to maintain high software quality
- Identified and documented bugs, inconsistencies, and areas for improvement in digital solutions
- Collaborated with developers, system analysts, and testers to enhance software performance

CSSEC (Computer Science Student Executive Council) Ateneo de Davao University, Davao City, Philippines
Committees
Member 2022 - 2025

- Wizards/DRRM Committee – Assisted in disaster risk reduction and management initiatives
- Production Committee – Contributed to event planning and execution for CSSEC activities
- Communication Committee – Managed public relations and information dissemination for student events
- Processors Committee – Supported organizational decision-making and workflow improvement

DurianPy – Davao Python User Group Davao City, Philippines
DurianPy Core Volunteers 2025 2025

- Assisted in organizing meetups and technical sessions, facilitating discussions on Python trends, tools, and best practices.
- Supported community outreach and engagement initiatives to grow local interest and participation in Python programming

Ateneo de Davao Scholar Society Ateneo de Davao University, Davao City, Philippines
ASEV Volunteers 2022 - 2024

- Assisted in organizing and facilitating orientation programs and community-building events for new scholars and students.
- Supported event logistics, registration, and coordination, ensuring smooth execution and positive participant experiences.
- Collaborated with student leaders and university staff to promote engagement and inclusivity among scholar communities.
- Contributed to planning and execution of academic and social initiatives aimed at fostering leadership and service.

- Encouraged peer involvement through mentorship and active participation in outreach and volunteer programs.

Certifications

CCNA: Introduction to Networks — Cisco Networking Academy
Issued by Cisco | Verified by Cisco
Badge: https://www.credly.com/badges/61a74b7d-272a-42a4-a995-2b3afdefb2af

- Demonstrated foundational knowledge of networking concepts including IP addressing, Ethernet, and data link protocols. Completed 54 lab exercises (≈14 hours) using Cisco routers, switches, and Packet Tracer for network configuration and troubleshooting.

Skills & Interests

Technical Skills

Programming Languages:

- Python (Beginner)
- Dart (Intermediate)
- Java (Intermediate)
- JavaScript (Intermediate)
- HTML (Intermediate)
- CSS (Intermediate)
- SQL (Intermediate)
- PHP (Intermediate)

Database & Backend:

- MySQL, PostgreSQL (Intermediate)
- DynamoDB (Beginner)
- RESTful API Development
- CRUD Operations & Data Modeling

Amazon Web Services (AWS):

- Lambda
- DynamoDB
- API Gateway
- S3
- Cognito
- CloudWatch
- IAM
- KMS
- SAM CLI
- Amplify
- Serverless Architecture Design
- Basic CI/CD (GitHub Actions, AWS Amplify)
- Ubuntu/Linux Administration

Frameworks & Libraries:

- • Flutter (Mobile Development)
  • React.js (Intermediate)
  • Express.js (Basic)
  • Bootstrap / Tailwind CSS (UI Frameworks)

Tools & Platforms:

- Git (Intermediate)
- Firebase (Beginner)
- Android Studio (Beginner)
- NetBeans (Beginner)
- Figma (Intermediate)
- Linux (Intermediate)
- Ubuntu (Intermediate)
- Odoo (Intermediate)

Version Control & Collaboration:
- Git & GitHub (Intermediate)
- Agile & Scrum Methodology
- Jira / Trello (Task Tracking)

Networking & Infrastructure:
CCNA: Introduction to Networks (Cisco)
- IP Addressing
- Ethernet Configuration
- VLANs & Subnetting
- Router/Switch Setup
- Packet Tracer Simulation

Soft Skills:
- Communication & Team Collaboration
- Time Management & Organization
- Analytical Thinking
- Adaptability & Continuous Learning

Interests:
- Software Development & App Design
- UI/UX Research & Design
- Front-End & Back-End Development
- Quality Assurance (QA) Testing & Debugging
- Customer Service & Technical Support
- Multitasking & Problem-Solving

Hobbies:
- Reading tech blogs
- Playing strategy games
- Volunteering in community projects

Passion:
- Passion for open-source projects
- Learning new programming languages
- Contributing to local developer communities Tech Interests
- Cloud Computing
- AI & Machine Learning
- Mobile App Development

Language:
- Filipino – Native
- Cebuano – Native

- English – Proficient
